Vote Based Auto Changeover - VVT

Easy Control Wiring...

At last SIMPLE, LOW COST, EASY TO INSTALL VVT

GEN II - VVT is a commercial Auto Changeover zoning system that controls a single HVAC unit and supports 2 - 17 modulating zones. The control panel is Universal, supporting Gas/ Electric or Heat Pump applications with two cooling stages and three stages of Heat.

A NEW GENERATION OF ZONE CONTROL

GEN II Special Features Include:

Vote Based System with Priority voting

Contractor selects and assigns 1, 2, or 3 votes to prioritize any zone.

Opposing Call Feature

which can be enabled or disabled by the contractor to address unsatisfied or unserved zones.

2nd Stage Operation Field configurable by the contractor based on:

1. Time and discharge air temperature
2. Time and room temperature
3. Time is adjustable from 3-30 minutes

Worry-Free Wiring GEN II provides the contractor with a simple display that verifies proper wiring installation and leads you to wiring errors in seconds.

Additional Options

- With the touch of a button the contractor can configure the system for air balancing, opening all dampers and energizing the fan.
- Pushing 1 button automatically establishes default occupied and unoccupied Heating and Cooling set points for every thermostat in the system.
- 3 auxiliary heat options available

Use **GEN II** to update old Carrier VVT, Parker or Trane Systems using the **existing dampers** or boxes already on the job

GEN II IS YOUR SOLUTION

if you have been frustrated by
costly and complex systems

TAILOR THE SYSTEM TO YOUR SPECIFIC APPLICATION
