 - Selectable Priority
 - Night Setback Included
 - 2 Hour Override
 - Lock Stats Remotely
 - Startup Diagnostic
 - No Home Run Wiring
 - No Computer Required For Setup

GEN II - A NEW GENERATION OF ZONE CONTROL

GEN II Special Features Include:

Vote Based System with Priority voting - Contractor selects and assigns 1, 2, or 3 votes to prioritize any zone.

Opposing Call Feature which can be enabled or disabled by the contractor to address unsatisfied or unserved zones.

Contractor may initiate 2nd stage operation by:

1. Time and discharge air temperature
2. Time and room temperature
3. Time is adjustable from 3 - 30 minutes

GEN II provides the contractor with a simple display that verifies proper wiring installation.

With the touch of a button the contractor can configure the system for air balancing, opening all dampers and energizing the fan.

Pushing 1 button automatically establishes default occupied and unoccupied Heating and Cooling set points for every thermostat in the system.

The **SYSTEM 2000 GEN II** is a commercial modulating Auto Changeover zoning system that controls a single HVAC unit and supports 2 - 17 modulating zones. The control panel is Universal, supporting Gas/Electric or Heat Pump applications with two cooling stages and three stages of Heat.

GEN II is recognized as the Industry's easiest zone control system to install and wire. Modulating dampers operate over an unshielded two-wire data link, along with 24V power wires all daisy chained from stat to stat with no home run wiring required.

The **GEN II** system does not require a computer to set up or operate.

The Industry's easiest commercial control system to install, operate and wire.
