

Temperature Access Point

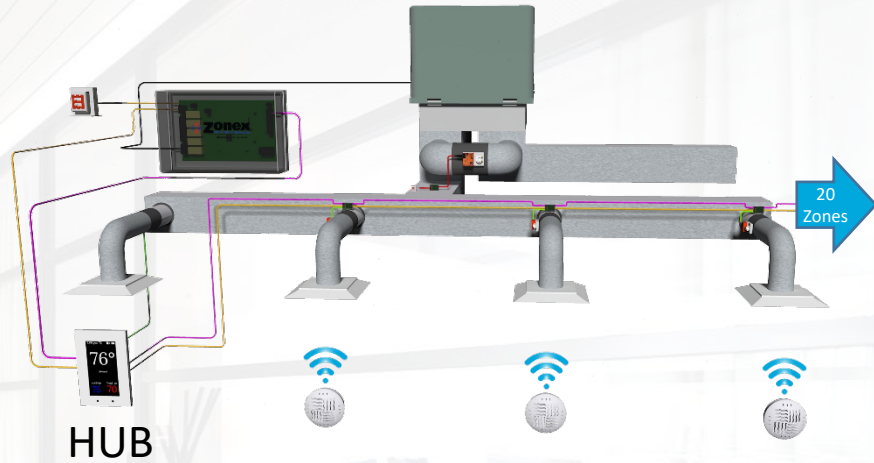

The innovative way to control your environment

WITHOUT thermostats

What is a Temperature Access Point (TAP)?

TAPs are one way temperature transmitters using Bluetooth technology to eliminate the need for multiple zone thermostats. Only slightly larger than the diameter of a quarter, these amazing devices send zone temperatures to the Zonex controller on a continual basis to ensure occupant comfort and prevent unauthorized system changes.

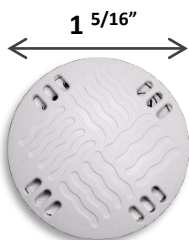

- No companion thermostat required
- No wires to run through the wall
- Up to 5 year battery life
- Up to 20 zones per unit
- Easy to install
- Paintable
- Prevents occupant tampering
- Does not interfere with other Bluetooth devices or Wi-Fi networks

Use in:

Office Buildings
Retail
Dining

Or anywhere zone temperature control is needed **WITHOUT** thermostats

Medical Offices
Education/Schools
Custom homes

Use **TAPs** to eliminate thermostats from your system

Add TAPs to your next job
