

# GEN V

**Manage your system from a single point with a simple & easy to use interface.** Simplify your management experience with GEN V, no complex software to learn, no PC or internet connection required.

**10 zones per RTU or split-system.**

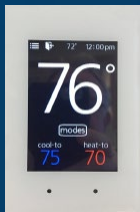

For Light Commercial Projects 5 Tons & Under Using Two Position Dampers

## GEN V Controller

Simple daisy-chain control wiring

## EzTouchV HUB Stat

Elegant design, high tech performance

## TAP Temperature Access Point

Wirelessly connects to & controls zone dampers

## Zone Damper 2 Position

Affordable and easy to install

Manage the entire system from one central HUB, no internet connection required

Control one zoned unit with up to 10 zone dampers per unit or control 20 standalone roof top units or split systems.

Color LCD touchscreens and intuitive menus make system management effortless

**TAP - Temperature Access Point:** temperature sensors that communicate wirelessly with their dampers, can be painted, and can be mounted anywhere

4 Daily schedules plus Vacation/Holiday scheduling can be set individually or globally

Programmable fan scheduling to optimize air purification

ADR / FDD for Title 24 compliance

Simple daisy chain wiring from the GEN V stat to stat, with no home run wiring required

No computer required for setup or management

Prioritize stats from the HUB with 0,1,2, or 3 votes

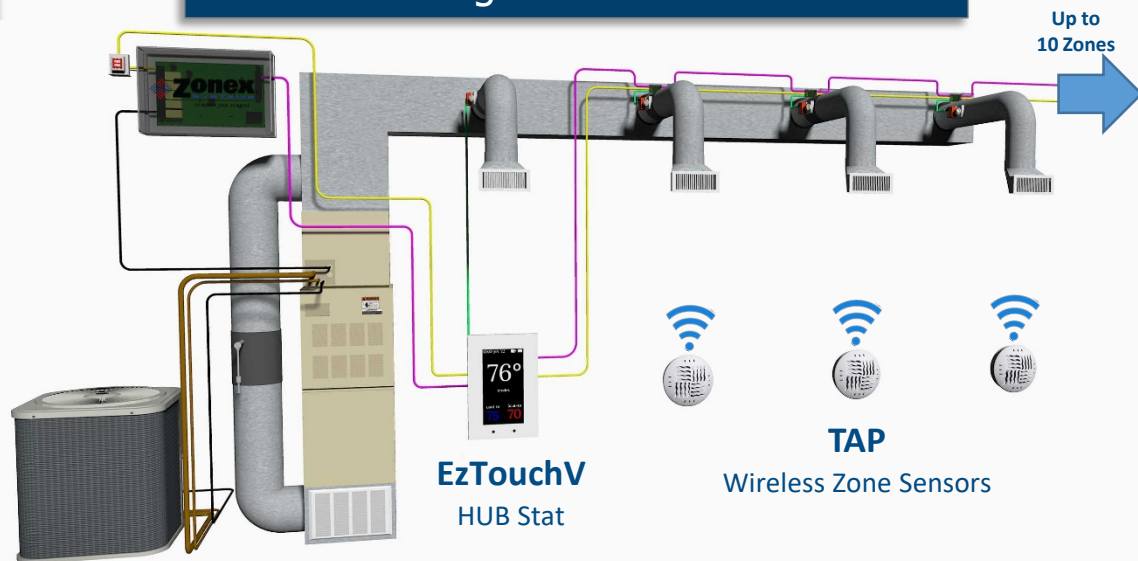

On board diagnostics streamlines troubleshooting

The GEN V communicates with an EzTouchV HUB thermostat that allows easy configuration of the GEN V controller with up to 10 zones.

From the HUB thermostat you can monitor communications and operations of the entire system. Modify thermostat set points individually or globally, lock stats with 0° or +/-2° variance, set an individual or global schedule per zone, and vacation schedules.

## Zone control for split systems or RTUs Using Stats or TAPs

Manage zone stats *controlling 2 position dampers* and/or standalone stats that control RTU or split systems
